

# Artemis Pro COMBINATION POOL

The **Artemis Pro** combination pool allows each section of the pool to operate at a different temperature.

For swimming in the pool end, adjust the water temperature so as not to overheat during exercise. On the other side of the thermal wall the fully featured hot tub can be run at a much higher temperature to enable your body to relax, benefiting your circulation and tired muscles.

The pool end is fitted with an ultra powerful 4 turbo jet system with a variable speed drive. Adjust the water speed to match different swim styles and swimmer abilities.

The hot tub end of the Artemis features 56 adjustable hydro-therapy jets across three seats and two full length loungers.

## ARTEMIS SPECIFICATIONS

8m x 2.25m x 1.54m

3 seats, 2 loungers
